About us

THE FOUNDERS

Victor Gevers (also known as 0xDUDE) is a senior security specialist working as innovation manager for the Dutch Government, specialised in network, mobile, and web application security. He performs research on state-of-the-art attack and defence mechanisms, hacking techniques and OSINT. In his free time, he is a vulnerability researcher and hunts down weak security implementations. In several occasions, he has been pointed out to be a truly responsible disclosure evangelist, practising the art over 19 years and has made over five thousand responsible disclosures world-wide.

Vincent Toms works as a cyber security specialist / consultant for the Dutch Government. In the last 15 years he has gained extensive knowledge in advising & providing assurance in the areas of IT Security, Governance, Risk and Control.

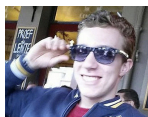

He worked for more than 12 years for the Ministry of Defense as IT auditor and did several postgraduate courses in the field of IT Governance, Risk and Control. The last 5 years he uses his knowledge in advising organization(s) about Cyber Risk and Control

THE MEMBERS

Grijp Pijpers is a freelance journalist who writes about technology, privacy and innovation on a daily basis. He specializes in (mobile) security and has the desire to make tech understandable and accessible to a broad audience.

In the last 7 years he has worked for various on- and offline publications and has gained extensive knowledge of the Dutch media landscape. He also loves functional gadgets, Scandinavian design and a good cup of coffee.

Sjoons Wlaenen graduated from Fontys University of Applied Sciences in ICT & Cyber Security. His graduation project consisted of achieving ICT security intelligence by aggregating open source intelligence.

This resulted in a tool that GDI uses to find (new) ICT vulnerabilities in organizations worldwide. In the coming period Sjoons will improve the tool so it can be used on a larger scale to detect trends, vulnerabilities and active abuse.

Jan Herthof is a freelance Quality Assurance and Test Manager. He has over 25 years of project experience in Quality, Test and Risk management in both public and private organizations.

In the last 4 years his focus has shifted towards Penetration Testing and IT Security Risk Control management. Jan is motivated to actually contribute to a safer internet, which is in line with the goals of the GDI Foundation.

Dylan Ketz is a software developer who works heavily in data analysis. He has worked to create several honeypotting and OSINT programs both with GDI and outside of it. His tools are used by security professionals across the world. He has worked with the GDI Foundation to provide insight into the methods of attackers and prevent new vectors from being exploited.

A safer internet
for everybody and everywhere.
To protect you, me and our kids.
And prevent any misuse of information.
